

1 Amendment/Response "C"

2 Status of the Pending Claims

3 No claims are being amended, added or cancelled herewith. The status of
4 each claim as of this response is as provided below:

5
6 Claim 1 (Previously presented). A method for configuring a computer to obtain
7 status information for subsequent print jobs to a printer, the method comprising:

8 supplying a proxy printer driver in place of an actual printer driver associated
9 with the printer; and

10 setting a flag so as to indicate that the computer is able to provide status for
11 print jobs on the printer.

12
13 Claim 2 (Original). The method of claim 1 further comprising:

14 configuring the computer to spool RAW datatype to the printer.

15
16 Claim 3 (Original). The method of claim 1 further comprising:

17 storing a unique identifier of the computer.

18
19 Claim 4 (Original). The method of claim 3 wherein the computer utilizes an operating
20 system having a registry, and the storing step comprises:

21 storing the unique identifier of the computer in the registry.

22
23 Claim 5 (Cancelled).

24
25 Claim 6 (Previously presented). The method of claim 1 wherein the computer
utilizes an operating system having a registry, and the flag is within the registry.

1 Claim 7 (Original). The method of claim 1 further comprising:

2 hooking a function in the actual printer driver.

4 Claim 8 (Original). The method of claim 1 further comprising:

5 hooking a function in an interface to the actual printer driver.

7 Claim 9 (Original). A method of gathering status for a print job from a computer to a
8 printer, the method comprising:

9 executing a proxy printer driver while producing the print job, wherein the
10 proxy printer driver is a proxy for an actual printer driver;

11 inserting into the print job a unique identifier of the print job; and

12 querying at least one of a spooler and the printer regarding status of the print
13 job.

15 Claim 10 (Original). The method of claim 9 further comprising:

16 detecting inception of the print job.

18 Claim 11 (Original). The method of claim 9 further comprising:

19 producing a notification of the status of the print job.

21 Claim 12 (Original). The method of claim 9 wherein the step of executing the proxy
22 printer driver comprises:

23 receiving a call to a function; and

24 calling a corresponding function in the actual printer driver.

25
(Continued on next page.)

1 Claim 13 (Original). The method of claim 9 wherein the step of executing the proxy
2 printer driver comprises:

3 producing RAW data.
4

5 Claim 14 (Previously presented). A computer readable medium on which is
6 embedded a computer program, the program comprising:

7 a proxy printer driver translation part, the proxy printer driver translation part
8 being a proxy for an actual printer driver translation part; and

9 a status configuration utility, wherein the status configuration utility is
10 configured to set a flag indicating that a computer is able to provide status for print
11 jobs.
12

13 Claim 15 (Cancelled).
14

15 Claim 16 (Original). The computer readable medium of claim 14 wherein the
16 program further comprises:

17 a status monitor.
18

19 Claim 17 (Original). The computer readable medium of claim 14 wherein the
20 program further comprises:

21 a spooler, wherein the spooler comprises a port monitor.
22

23 Claim 18 (Original). The computer readable medium of claim 14 wherein the
24 program further comprises:

25 a graphic device interface.

(Continued on next page.)

1 Claim 19 (Original). The computer readable medium of claim 14 wherein the
2 program further comprises:

3 a registry.
4

5 Claim 20 (Original). The computer readable medium of claim 14 wherein the
6 program further comprises:

7 the actual printer driver translation part.
